To the FCC, why would you even consider putting a stop to some thing that works? With XM radio local weather and traffic reports I am able to plan my trips to avoid problems on the road. This last winter was my first with XM radio, and it made A big difference in my travels.

Please do not even consider petition 04-160.

I have found something that helps me by keeping me informed and safer on the road. This something that I am more then willing to pay for. The NAB tried to stop FM radio and tried to stop TV now they are going to try to stop satellite radio?? Perhaps they should improve the service that my self and millions of people deserve. If they provided the service and coverage would there be an issue? They don't seem to learn.

I fully support XM's ability to provide the kind of programming that I demand and deserve. This is the best thing to come since sliced bread.

In closing,
I respectfully urge the FCC to reject the NAB's petition 04-160.

Thank you for taking the time to read this,
Aaron Tzvi
